JORDAN HOWSON

Final-year Information Technology student. Melbourne, Australia.

jordan.s.howson@gmail.com | jordanhowson.com | LinkedIn | GitHub

I'm completing a Bachelor of Information Technology at Victoria University, majoring in web and mobile application development with a minor in ICT management. I graduate in November 2026.

Experience

Jul 2025 to Mar 2026

Software Engineering Intern, Aubot

Coding education platform

- Reviewed SQL teaching materials and updated exercises and assessment questions to use consistent datasets.
- Designed SQL databases and documented their structures with entity relationship diagrams and data dictionaries.
- Reviewed Python lessons and code examples, correcting errors in code and technical explanations.
- Discussed requirements and revision priorities with the team.

Feb 2021 to Feb 2023

Technician & Technology Sales Specialist, Harvey Norman

Sales and technical support

- Diagnosed and repaired hardware and software faults on PCs, laptops, tablets and phones.
- Handled support requests in person and by phone. Logged service requests and resolved network, email and driver issues.
- Installed operating systems, configured user accounts and network connections, and backed up customer data.
- Advised customers on computers and accessories based on how they planned to use them.

Projects

JavaScript, TypeScript, HTML, CSS

Student Project Showcase

Built a student project showcase for my university capstone. Staff use it to publish projects to digital displays, with QR codes for viewing the same content on a phone. The system uses Strapi, Node.js and TypeScript, with role-based access and Docker Compose for kiosk deployment.

Read the case study

Python, Windows APIs, Tkinter

Automatic Printer Switcher

Built a tool for a company that selects the right printer when a Windows Remote Desktop session changes. It began as a PowerShell script before I developed a Python application with a settings interface, background monitoring, logs and configuration backups.
