

JORDAN HOWSON

Software and systems engineer. Melbourne, Australia.

I'm in my final year of a Bachelor of Information Technology at Victoria University, majoring in web and mobile application development with a minor in ICT management. The work I enjoy most sits between writing software and running it.

That comes from working both sides of it. Two years as a technician meant fixing hardware and network failures. My engineering internship was the reverse, writing and debugging code where every line had to be correct. Between them I learned to care about how software runs and gets handed over, not only how it is written.

EXPERIENCE

Jul 2025 to Mar
2026

Software Engineering Intern, Aubot

Educational content

- Wrote programming materials and example code across core computer science topics.
 - Reviewed and debugged existing examples, reproducing issues and correcting logic and output.
 - Worked with engineers to confirm technical accuracy, and kept every example runnable as written.
-

Feb 2021 to Feb
2023

Technician & Technology Sales Specialist, Harvey Norman

Tech team

- Diagnosed and repaired hardware and software faults on PCs, laptops, tablets and phones.
 - Configured and deployed systems: operating system installs, user accounts, and network setup.
 - Troubleshoot network outages, email errors and driver conflicts, in store and by phone.
-

PROJECTS

Strapi, Docker

Student Project Showcase

A self-hosted showcase that puts student projects on wall-mounted smart TVs, with on-screen QR codes that open mobile-friendly project pages. Staff publish through the CMS, and the TVs run themselves.

Windows, C#

Retail POS Printer Switcher

A lightweight system-tray tool that picks the right printer automatically based on the active app, so retail staff stop printing receipts to the label printer. Built for people who should never have to open printer settings.

Python

Open-IPTV

A fast desktop client for IPTV. You point it at your own source, an M3U playlist or an Xstream Codes login, and it handles indexing, a live guide and playback. It hosts no streams itself and nothing phones home.

SKILLS

Languages

Python, Java, JavaScript, PHP, SQL

Web

HTML, CSS, CMS development, web application and server management

Systems

Operating systems, computer networks, shell scripting, Docker

Data

Relational design and SQL querying

Delivery

Project management, ICT management, ICT change management

EDUCATION

Expected Nov
2026

Bachelor of Information Technology

Victoria University, Melbourne

Major in web and mobile application development, minor in ICT management.

High distinctions in Object Oriented Programming, Cloud Application Development, Software Engineering, Online Business System Development, Operating Systems, Web Application and Server Management, Web Development and CMS, Advanced Web Application Development, IT Capstone Project 1, and ICT Change Management.
