

JORDAN HOWSON

Graduate Information Technology Student. Melbourne, Australia.

I'm completing a Bachelor of Information Technology at Victoria University, majoring in web and mobile application development with a minor in ICT management. I graduate in November 2026.

EXPERIENCE

Jul 2025 to Mar 2026

Software Engineering Intern, Aubot

Coding education platform

- Developed Python examples and exercises for advanced software development subjects, translating technical concepts into clear learning materials.
 - Designed and tested SQL database exercises and assessment material.
 - Debugged existing code samples, reproducing faults and correcting logic and output.
 - Worked with industry professionals in an Agile environment across multiple software projects, coordinating requirements and priorities with stakeholders.
-

Feb 2021 to Feb 2023

Technician & Technology Sales Specialist, Harvey Norman

Sales and technical support

- Advised customers on technology purchases, translating technical specifications into clear, practical recommendations to support sales targets.
 - Diagnosed customer needs and explained technical issues in plain language before recommending solutions.
 - Diagnosed and repaired hardware and software faults on PCs, laptops, tablets and phones.
 - Configured and deployed systems: operating system installs, user accounts, and network setup.
-

PROJECTS

JavaScript, TypeScript,
HTML, CSS

Student Project Showcase

Designed a self-hosted system that shows student projects on wall-mounted smart TVs, with QR codes on screen that open a mobile-friendly page for each project. Staff publish through the CMS and the TVs update themselves, so nobody has to maintain it.

[Read the case study](#)

Windows, C#

Retail POS Printer Switcher

Retail staff kept sending receipts to the label printer by mistake. I wrote a small system-tray tool that picks the printer based on whichever app is in front, so nobody has to open printer settings. It gets configured once and then left alone.
