

# JORDAN HOWSON

Graduate Software Engineer. Melbourne, Australia.

---

I'm completing a Bachelor of Information Technology at Victoria University, majoring in web and mobile application development with a minor in ICT management. I graduate in November 2026.

---

## EXPERIENCE

Jul 2025 to Mar  
2026

### Software Engineering Intern, Aubot

*Coding education platform*

- Developed Python examples and exercises for advanced software development subjects.
  - Designed and tested SQL database exercises and assessment material.
  - Debugged existing code samples, reproducing faults and correcting logic and output.
  - Worked with industry professionals in an Agile environment across multiple software projects.
- 

Feb 2021 to Feb  
2023

### Technician & Technology Sales Specialist, Harvey Norman

*Tech team*

- Diagnosed and repaired hardware and software faults on PCs, laptops, tablets and phones.
  - Configured and deployed systems: operating system installs, user accounts, and network setup.
  - Troubleshoot network outages, email errors and driver conflicts, in store and by phone.
- 

## PROJECTS

JavaScript,  
TypeScript,  
HTML, CSS

### Student Project Showcase

A self-hosted system that puts student projects on wall-mounted smart TVs, with on-screen QR codes that open mobile-friendly project pages. Built so student work gets seen beyond the classroom. The hard requirement was that nobody maintains it: staff publish once through the CMS and the displays handle the rest.

Windows, C#

### Retail POS Printer Switcher

A lightweight system-tray tool that picks the right printer automatically based on the active app, so retail staff stop printing receipts to the label printer. I watched this failure repeat for years on the retail floor, so I built the fix: no settings to open, no training to give, it just switches.

Python

### Open-IPTV

A fast desktop client for IPTV. You point it at your own source, an M3U playlist or an Xstream Codes login, and it handles indexing, a live guide and playback. Built to prove a desktop app can be quick and private at the same time: it hosts no streams itself and nothing phones home.

## SKILLS

*Languages*

Python, Java, JavaScript, TypeScript, C#, C++, PHP, SQL

*Web*

HTML, CSS, React, Node.js, CMS development

*Databases*

PostgreSQL, MySQL, SQLite, relational design and SQL querying

*Cloud*

AWS, Azure, web application and server management

*Tools & systems*

Git, GitHub, Docker, Linux, shell scripting, computer networks

*Management*

Project management, ICT management, ICT change management, Agile delivery

## EDUCATION

Expected Nov  
2026

### Bachelor of Information Technology

*Victoria University, Melbourne*

Major in web and mobile application development, minor in ICT management.

High distinctions in Object Oriented Programming, Cloud Application Development, Software Engineering, Online Business System Development, Operating Systems, Web Application and Server Management, Web Development and CMS, Advanced Web Application Development, IT Capstone Project 1, and ICT Change Management.
